Different Texture

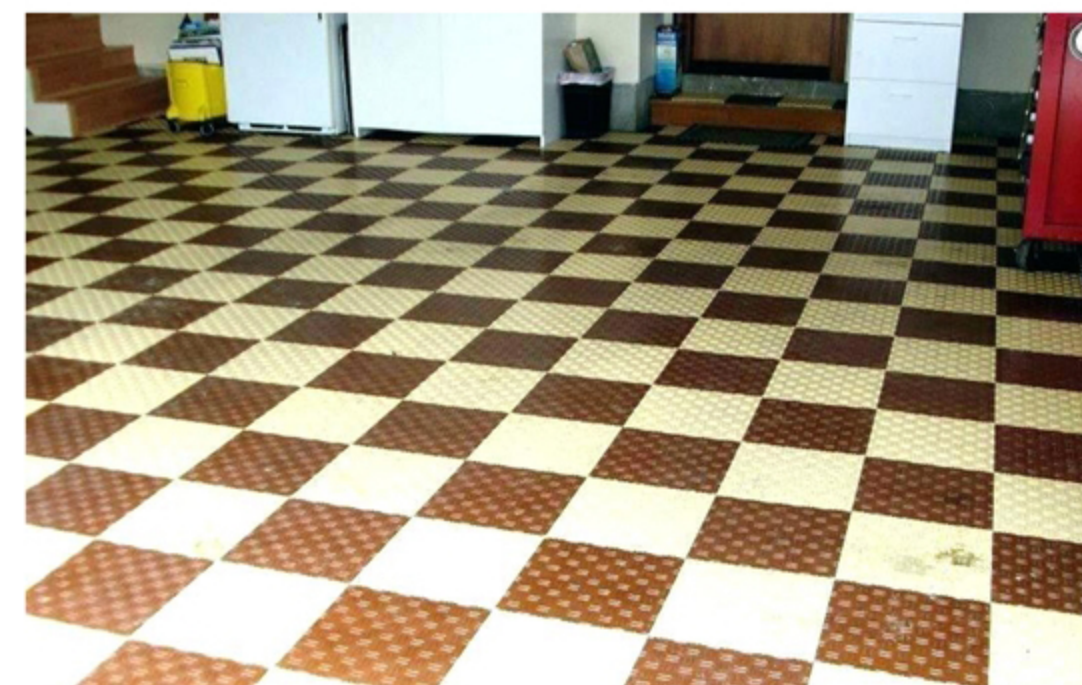

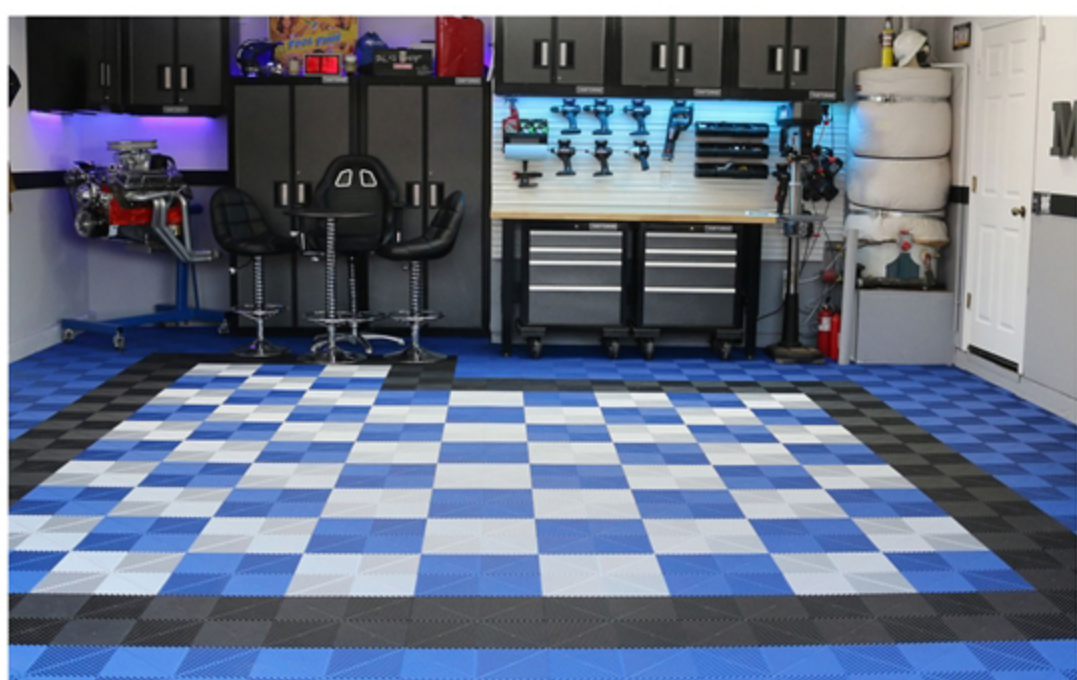

- High-grade anti-slip layer, applying plasma matte technology, non-slip texture, smooth and no dead angle
- PVC steel plate is made of 100% waterproof material, the waterproof performance is much better than the traditional floor, the daily maintenance is simple, just wipe with a mop.
- Thickened floor, anti-pressure, anti-scratch and wear resistance is more than 3 times that of ordinary floor.
- The floor is flame retardant and fire resistant, meeting the needs of fire protection. Flammable items such as cigarette butts are not easy to burn on the floor.

Application

Outdoor · Interior

Playground · Car showroom · Exhibition · Garage
